# Adnan Sweeney

Software Developer

---

## EXPERIENCE

### Front-End Engineer

Thomson Reuters | Kitchener ON | May 2019 - Aug 2019

Collaborated directly with key stakeholders to create and adjust requirements for development of a VAT Tax Dashboard PoC

Created middleware to retrieve and format sales data with filtering capability

Built responsive, interactive sales visualizations to display tax data on desktop, tablets, and mobile devices using D3 as a member of a 3-person team

### Full-Stack Developer

Workplace Safety Insurance Board | Kitchener ON | Sept 2019 - Dec 2019

Independently developed a PoC Google Assistant app to check user claim status from a Firestore database via a customized ExpressJS API

Mocked up and built a step-by-step form validation to determine a user's eligibility for hearing loss coverage

Added functionality to an ExpressJS API linking AWS hosted backend data to hearing loss web app

Contributed to various React projects such as a responsive Idea Bank solution for employee idea submissions, and a step-by-step eligibility calculator for noise-induced hearing loss claims

### Web Application Developer

Sunlife Financial | Toronto ON | Jan 2018 - Apr 2019

Developed, updated, and tested the Sunlife Financial Amazon Alexa Skill from scratch to production as an Agile team member

Built a responsive, step-by-step account linking portal to allow users to connect their Amazon Alexa to their Sunlife account

Demonstrated Alexa Skill progress and PoC functionality to business leaders

### GRS Application Developer

Manulife Financial | Kitchener ON | Sept 2016 - Apr 2017

Integrated complex SQL queries and bug fixes into stored procedures affecting large, pre-existing systems

Applied SQL Server Reporting Services (SSRS) to create and schedule automated reports
